all thinking less thinking deeper now words are what [I have defended them with them] today called upon to make them fabric in and underneath what is around them [to have blessed would look like what]
inside ordinary circumstances instances of indecision accumulate (abbreviate substantially) any preponderance of infant wonder black shoe white shoe one step too saturated for morning—3 kids on 3 different days run out the screendoor, slamming never looking back
rhapsodaisical (enc)losures soften mownness, yes? a tumbler full of rasp- and three of something other leaves the maturation process out of wonder in a capstone kind of way through to the circumstantial envelope screening or aligning or nether-minding mending having to be done inside (this cherished child one never has but is)
lack of rhapsody blinking at insects, wind indeterminate against clouds of still. anthem over declaring horn, stand and nod like the postman who should smile and say something about mother's blankets or the delivery of perishables. everyone bankrupt long before the curse of nationalism rattles the windows.
able to perish, yes. a garden were his words. the exact fit for a prior only now are sects. and happenstance not really that determines no wait it does not matter.
nor kept secrets. the endowment of young light condones wind instruments as if postered behind closed something where rush hour goes unfelt. the managed lack of care characteristic of them leaves clairvoyant out of the long list of synonyms and why not.
courage bolstered or misplaced or guise of sweetened margaritas slipping easily down or into or by association the trouble conducted by words alone without

context or blanket of apprehension neglected careful nautical planning. bring the boat around to the front, will you dear? there is nary a moment I don't sail 2words quiet place faraway place island place—isolation is tasked with my arrival and can not wait for the holiday called vacation.
earful careful ask tea break swelling to nudge bounded labor. ring the oat a pound at a time momentum shirks the beauty. upholstery and rubble get along. cia text messages lipoff the great gare on or northage land leaving. the frontage road wills itself lacy. unsupported. insupportable. quiet way. solaria give room to each lean ray across the is.
comfort is emboldened if not calous reminder around the hour of ships docking—always waiting waiting it seems for matters of bitter bright importance lagging lackluster assortment trailing windy & gutface fanatical embargo shifting.
lately without numbers the calculation is in clusters of consonants scorched by occasional lipsinking customs; cargo babies speak the clearest language known to woman, so smoove.
novenas enlarge the wavelengths one absorbs tentatives to make the motion (the emotion) smooth as core matte ad infinitum hour of depth. this fragrance numb to fan over the barge occasions lip service. are you grazing lustre are you railbound is the minder all you capsize when should lap of water graze before overtaking (coming) back against the usual urges fail to lag late round illusions scrap metal and right flinching tick leafed customary stoking.
about the time corrosive signs overdetermine the price of admission a clock is dormant with straps tangent to free disk space acquired by accident. aquatic flower arrangement by the former staff highlights the repetition inherent in minding the spectrum of hollow & inside out galaxies worn thin by hypothesis & late night bulb burning. teams decipher what the rowers cannot accomplish in weeks of crossing the pond, crystal water baking under unrelenting El Niño.
qua stinging bulb perceived from far light reams of dissolving sides lax in hinting at a thesis the size of demigod a cipher off vows phished open keen on yonder chill

Orme Dam loaden with flower shades the various blue repetitions paced to signify and what inheres comes down to lock the traps and skid from under outerwear of these imagined actual baked hold from one's relenting opposite a mindful stance. delightful. dim reflection. divided by one. dilettante nervously awaiting taxi. desperation as a last resort. disguises appearing from around the corner. dalliance with archaic form reveals textual gnosis. dial zero to connect with the invisible operator. determination when lackadaisical interrupts happy light & yesterday's progeny.

genetic roaming charge still visible while in the operating room lacking specific daisies. naps within the building that was dial appear superfluous. who waits anymore as taxis divide mention among indeterminate collection of disguises. dimly lit integrity intended to show through reveals signs of the gnostic gospel. who connects with flight, the chemist or the bead artist. the deaf percussionist is lecturing via computer in the next room. she perfumes another person's senses with her zeal that might be called soft.

gifting spontaneous convictions. never november or a month away. mine are the only ones left hanging from the telephone wire. such as the derivation of sound in all languages. gutsy turbulance around revolutions of display. interface between water body & code hand gone akimbo. denying that proximity to coherence exists, each day is numbered for simplified genepatch. ability to dissect alterity rebukes all previous modes of idiom. dingbats stand between me & the ocean of endless lexicons.

compromise victory with months of amplified genetic breach. the kin one nigh rounds out phonetic summer odes. domingo style coherence echoes ire. long time sea(n) gives lexi cognates bulk. the tall one landing handball couplets weighs something out loud. a tangent is direct when/if first base regains off limits sensibility before cohering. ring tones cheshire their way ventricled. as if the toned while one bats a thou can patronize the monsoon whimper. go there and be less than con. around here telephones respond to fatuous young fire.

consequences are never sequential—waiting in the wings the wind wagered a theory of spellbound discourse diminishing | a tank of writing gaseous infiltration menacing road not rote not a way manual dexterous assimilated—voyeur cam improbabilities since delayed to the dismay of attendants & seriously funny host ammenities | staring till tomorrow starring the ones who don't.
hounding the stalwart for reduction of star scaffolding turns probabilities into mantras yes and yes against old likelihood. one watches and one waits. the toads that fill the pond yard man accidental notice on account of gerunds hooded in a flush of wind. some anklets whiter than these command revision. wingspan is not greenspan is not most of us. the ever present wince of dovelets might be shackled by a till held free of emptiness. and that is round as silhouettes. these two with winking intermittently gone rote against our better judge.

I said once is never enough when the singing stops the echo exaggerates assumptions. fix a hollow day I said to gain access to the inner chapters of his/her rusty book. benign light scattershot horizon I said the morning the car carried away envelopes. reticience, mad sayings never remembered correctly I said process-oriented task glue at the desktop.

Keppler works hard to distinguish between the days when he has the compunction to get to work on time & the days when he will impulsively mute the snarling alarm. Obsession badgers him to record precisely the temperature & the times when the neighbor's phone rings.
